## OBJECTIVE

To obtain a position managing and delivering challenging technical projects involving my field expertise in system architecture, software development, and project management.

## SUMMARY OF QUALIFICATIONS

- Capable Solutions Architect with a deep understanding of information architecture, usability design, deployment and capacity planning best practices. Primarily focused on Enterprise Collaboration and Content Management Systems leveraging the Microsoft SharePoint platform.
- Extensive experience working with clients on BPOS-S and BPOS-D engagements, managing design, implementation, and successful delivery of Microsoft SharePoint 2007 and 2010 solutions on the cloud.
- Impeccable track record as an effective manager with a strong technical background, excellent communication skills, and commitment to project delivery, able to manage global teams onshore and offshore.
- Excellent full life cycle project management skills with detailed understanding of product integration, data migration, application design and coding techniques, as well as a thorough understanding of testing methodologies.
- Microsoft Certified in SharePoint Development and Administration and relevant Microsoft web based technologies.
- Experienced software developer using the following server technologies: SharePoint; C# ASP.NET; AJAX; SQL; SQL Server; scripting tools; and the following web technologies: JavaScript, including jQuery and JSON; CSS; and XSLT / XML.
- Fluent in English, Spanish; Intermediate French.

## RELEVANT EXPERIENCE

### Microsoft, Phoenix, AZ

The consulting and enterprise support division of Microsoft.

#### 2011-Present: *SharePoint and Cloud Solutions Consultant*

- Deliver high-impact high-quality software to Fortune 500 companies, helping customers achieve a maximized return on their investment in Microsoft products and technologies in the enterprise.
- Provide trusted guidance, architecture, and roadmaps to enterprise solutions hosted on the cloud and on premises.

### Avanade, Inc. Phoenix, AZ

Premier global system integrator consultancy for the Microsoft platform.

#### 2006-2011: *Senior Consultant, Subject Matter Expert on Enterprise Collaboration*

- Managed and successfully delivered several mission critical portal solutions for Fortune 500 companies, leading medium to large development teams both onshore and offshore.
- Effectively reversed behind-schedule high-risk projects into on-time quality solutions with high customer satisfaction by applying project management methodologies and subject matter expertise; Often promoting positive relationships and securing additional work in the process.
- Actively developed intellectual property and documentation assets for internal use among fellow Avanade consultants; Compile presentations and internal community involvement to promote knowledge base management.

### TrueLD Telecommunications Tucson, AZ

Local startup providing telephony products and services to regional markets.

#### 2005-2006: *Consultant, Software Developer and System Administrator*

- Lead initiatives to develop custom applications and processes for business automation, significantly improving efficiency while reducing information technology operating costs.
- Established SDLC processes and intranet collaboration systems as a foundation to promote team work.

## EDUCATION
